Purpose

The Water Development Coordinating Council is creating the Unified Water Infrastructure Plan (UWIP), a comprehensive prioritized list of water infrastructure projects that will potentially need state funding. The plan will improve coordination between water funding agencies and simplify the process for entities that are seeking funding for water infrastructure projects. In accordance with [Utah Code 73-10g-603](#), the council “shall seek and consider public comment related to developing the written prioritization process by holding public meetings at locations throughout the state.”
