April 10, 2020

Dear Mr. Baxter,

Thank you for working with us on the Lake Powell Pipeline Project. While Kane County Water Conservancy District continues to support the Project and believes that the Pipeline is absolutely essential to the future of southwestern Utah, after careful analysis and consideration, the District no longer wishes for Kane County's future water supply needs to be included as part of any alternative in the current NEPA process. Please accept my commitment and availability to contribute whatever support might be necessary to help develop the NEPA process to a conclusion.

Sincerely,

Michael E. Noel  
General Manager

Kane County Water Conservancy District
